## Risk Category Details

Conservative

Conservative Investors want stability and are more concerned with protecting their current investments than increasing the real value of their investments. A Conservative Investor is generally seeking to preserve capital and as a trade-off is usually prepared to accept lower investment terms.

**Moderately Conservative**

Moderately Conservative Investors are those who want to protect their capital and achieve some real increase in the value of their investments. This Investor is usually seeking a diversified investment portfolio with exposure to a broad range of investment sectors.

**Moderate**

Moderate Investors are long-term Investors who want reasonable but relatively stable growth. Some fluctuations are tolerable, but Moderate Investors want less risk than that attributable to a fully equity based investment.

**Moderately Aggressive**

Moderately Aggressive Investors are long-term Investors who want real growth in their capital. A fair amount of risk is acceptable.

**Aggressive**

Aggressive Investors are long-term Investors who want high capital growth. Substantial year-to-year fluctuations in value are acceptable in exchange for a potentially high long-term return. An Aggressive Investor is comfortable accepting high volatility in their capital with the risk of short to medium-term periods of negative returns. They are willing to trade higher risk for greater long-term return and have a long investment objective. This investor is usually seeking a diversified portfolio with exposure to a broad range of investment sectors.

**Note:** You have been made aware that due to the restrictions imposed by Regulation 28 of the Pension Funds Act, you are unable to select certain portfolio combinations. As a result, you acknowledge that, although the portfolios chosen are not in line with your risk profile, they comply with Regulation 28 requirements.
